

Topic: Building Writing Equations – Given a Point and Slope

Write the equation give a point and the slope.

1. Point = (1, 2) and $m = 7$

2. Point = (3, -1) and $m = -1$

3. Point = (-2, 5) and $m = \frac{-5}{2}$.

4. Point = (6, 5) and $m = \frac{5}{3}$
